Community InfoSource	Community InfoSource is a not-for-profit, Community Interest Company formed in Scotland in 2006. We are run by refugees or people from a refugee background and work for marginalised people including survivors of abuse, persecution, torture and trafficking. We assist them to overcome barriers they face to integration and employment and we help them to put their own ideas into action. Human Rights issues are of particular importance to us. At the Violence against Women Project we work in partnership with men from communities potentially affected by Female Genital Mutilation (FGM) in Scotland to raise awareness and prevent the practice of FGM. We are the first organisation working on FGM with men in Scotland.	View Website
